

LINUX PRIVILEGE ESCALATION

Aim:-

To perform Linux privilege escalation and obtain root privileges from a normal user account.

Algorithm:-

1. Login to linux systems
2. check current using whoami
3. enumerate system information and permissions
4. Identity misconfigurations (or) vulnerable files
5. Exploit the vulnerability to gain higher privileges
6. Verify root access using who am i

Questions

1. What is the hostname of the target system?

wade7363

2. What is the Linux Kernel version of the target system?

3.13.0-24 generic

3. What Linux is this?

Ubuntu 14.04 LTS

4. What version of python Language is installed on the system

2.7.6

5. What vulnerability seem to affect the Kernel of target system?

CVE-2015-1328

6. What is the content flag1.txt file?

THM-28392872729920

7. How many programs can the user "Karch" run on the target system with sudo rights?

3

8. What is the content of the flag2.txt file?

THM-402028394

9. How would you use Nmap to a spawn a root shell if your user had sudo rights

sudo nmap -i

10. What is the hash of Frank's password?

96\$2\$000\$0LlpXKXCr\$eImtg fExyr2B4jg3

11. Which user shares the name of a great comic book writer?

gerryconway

12. What is the password of user 2?

Password 1

13. What is the content of flag3.txt file?

THM-3847834

14. How many binaries have set capabilities?

6

15. What other binary can be used through its capabilities?

new

16. What is the content of the flag4.txt file?

THM-9349843

17. How many user-defined cron jobs can you see on the target system?

4

18. What is the content of the flag5.txt file?

THM-383000283

19. What is Matt's password?

123456

20. What is the odd folder you have write access for?

/home/murdoch

21. Exploit the \$PATH vulnerability to read content

No answer needed

22. What is the content flag6.txt file?

THM-736628929

23. How many mountable shares can you identify on the target system?

3

24. How many shares have the "no_root_squash" option enabled?

3

25. Gain a root shell on the target system

No answer needed

26. What is the content of the flag7.txt file?

THM-89384012

27. What is the content of the flag 1.txt file?

THM-42871992044

28. What is the content flag 2.txt file

THM-168824782390238

RESULT:-

The experiment has been successfully
computed & verified
