

CARNAGE

Aim:-

To analyze a packet capture (PCAP) file to identify and investigate malicious network activity resulting from a malicious email attachment using TryHackMe Room "CARNAGE"

Solve?

1. What was the date and time for the first HTTP connection to malicious IP?

Ans 2021-09-24 16:44:38

2. What is the name of zip-file that was downloaded

Ans documents.zip

3. What was the domain hosting the malicious zip file?

Ans 2hirenepal.com

4. Without downloading the file, what is the name of file in zip file?

Ans chart-1530076591.xls

5. What is the name of webserver of malicious IP from which zipfile was downloaded

Ans LiteSpeed

6. What is the version of webserver from previous question

Ans PHP/7.2.34

7. Malicious files were downloaded to victim host from multiple domains, what were the three domains

Ans finedewels.com.au, thiebiagt.com, new.americoib.cc

8. Which certificate authority issued the SSL certificate

Ans GoDaddy

9. What is the Host header for the first Cobalt Strike IP address from previous question

Ans bcsp.verisign.com

10. What is the domain name for the first IP address of Cobalt Strike IP address server?

Ans survmeter.live

11. What is the domain name of the second Cobalt Strike IP

Ans Securitybusinpuff.com

12. What is the domain name of post infection traffic?

Ans maldivehost.net

13. What are the first eleven characters that the victim host sends out to malicious domain involved in post-infection traffic?

Ans ZLispQRWZ19

14. What was length for the first packet sent out to C2 server

Ans 281

15. What was the server header for malicious domain from previous question?

Ans Apache/2.4.49.(cpanel) OpenSSL/1.1.1f/mod_bwlimit

16. What was the date and time when DNS query for IP check domain occurred?

2021-09-24 17:00:04

17. What was the domain in the DNS query from previous question?

api.ipify.org

18. What was the first MAIL From address observed in traffic?

Ans farshin@mailfa.com

19. How many packets were observed for the SMTP traffic?

Ans 1439

* RESULT:-

Thus the packet capture was successfully analyzed and malicious network activities, connections and indicators of compromise were identified using the TryHackMe Carnage room

~~Done~~
