NETWORK SECURITY ESSEN

* Aim :-

To study the basic concepts of network security and analyze essentials security mechanisms

* Algorithm :-

1. Study fundamental network security concepts
2. Identify common threats & attacks
3. Understand basic security controls & protections

1. Examine the firewall logs. which IP address is performing the port scan?

Ans 203.0.113.110

2. In WAF Logs which single source IP is responsible for all the blocked web attacks

Ans 198.51.100.12

3. In the VPN logs, how many brute-force attempts failed?

Ans 90

4. Which suspicious IP address was found attempting

Ans 45.137.22.13

5. Examine the firewall logs. What external IP performed most reconnaissance?

Ans 203.0.113.45

6. In the firewall log, which internal host was targeted by scans?

Ans 10.0.0.26

7. Which username was targeted in VPN logs?

Ans svc_backup

8. What internal IP was assigned after 3 successful VPN logins?

Ans 10.8.0.23

9. Which port was used for lateral SMB attempts?

Ans 445

10. In the IDS logs, which host beacons to C2?

Ans 10.0.0.60

11. During the investigation, which IP was observed to be associated with C2?

Ans 198.51.100.77

12. Which host showed the exfiltration attempts?

Ans 10.0.0.51

* RESULT :-

Thus the essential concepts of network security were studied & understood
